Summary

Front-End Developer specializing in React, TypeScript, and Next.js. Passionate about building modern, responsive, and accessible web applications with Tailwind CSS and Redux Toolkit. Committed to writing clean, scalable code and delivering fast, high-quality user experiences.

Projects

1. EstateIn

- Collaborated with a team of 7 developers to build a fully responsive real estate website using React, Firebase, Redux Toolkit, Tailwind CSS, and TypeScript.
- Implemented search, filtering, and responsive grid layouts using Tailwind CSS.
- Managed state efficiently with Redux Toolkit.

2. E-Commerce e-shop

- Developed a front-end e-commerce UI using React and TypeScript.
- Implemented responsive grid layouts using Tailwind CSS.
- Designed responsive layouts for mobile-first experience.

3. PhotoGram

- Developed a fully responsive social media web app using React,
 Tailwind CSS, Firebase, and TypeScript.
- Social media web app inspired by Instagram, enabling users to post images, like posts, and interact in real time.
- Integrated Firebase for authentication, real-time database updates.

Career goals

- Driven to become a standout front-end developer known for crafting scalable, responsive, and visually compelling web interfaces.
- I aim to contribute to innovative teams by applying advanced React and TypeScript techniques, optimizing UI performance, and delivering seamless user experiences.
- My long-term goal is to build a reputation for clean architecture, creative problem-solving, and consistent delivery of high-impact digital products.
